How to use this tool

This project planning tool will help you plan all the key elements of your Heritage project. You can do this digitally using an online tool like Canva or you can do it on a big sheet of paper with sticky notes. The aim is to help you think, plan AND notice where you don't have any information. Gaps or areas that don't have any information are areas where you need to do more thinking or research.

Use the questions and subheadings in Stories of Harrow Project Plan on page 3 to help you fill out your own plan. There is a blank template on page 4. You can also use this as a living plan throughout the duration of your project. Remember - you can always book onto an online workshop or Q+A session or reach out to Alex on alexm@vah.org.uk for help. Good luck!
